

Gregory Vance

Principal Technical Consultant (Full-Stack Architecture) New York, NY | (555) 012-3456 | gregory.vance@email.com | linkedin.com/in/gregoryvance

Professional Summary

Elite Principal Consultant with 12+ years of comprehensive technology consulting experience delivering strategic enterprise software transformations. Specialized in architecting composable polyglot systems merging Python analytical backends with real-time TypeScript frontends. Expert at legacy migration roadmaps and steering distributed multi-million dollar engineering initiatives.

Strategic Capability Matrix

- **Architectural Specialties:** Domain-Driven Design, Polyglot Microservices, Infrastructure as Code, High-Availability Networks
- **Engineering Stack:** TypeScript, JavaScript (Node/React/Next.js), Python (FastAPI/Django), GraphQL, Go
- **Cloud Infrastructure:** AWS Enterprise Solutions, GCP Cloud Architecture, Kubernetes, Docker, Terraform

Professional Experience

Apex Technology Consulting Group | New York, NY

Principal Consultant & Software Architect | January 2022 – Present

- Serve as primary strategic delivery lead for Fortune 500 tech modernizations, architecting scalable solutions utilizing Python backends and enterprise React web views.
- Led the technical recovery and re-architecture of a broken real-time trading broker platform for a global finance client, replacing bottleneck nodes with async FastAPI microservices.
- Author strategic migration playbooks adopted across multiple engineering divisions, reducing structural technical debt indices by 55% within 18 months.
- Advise client CTOs and executive panels on resource provisioning, cross-stack tooling selection, and security frameworks.

Vanguard Web Innovations | New York, NY

Lead Full-Stack Developer | June 2018 – January 2022

- Directed a team of 12 full-stack engineers in building high-performance web products leveraging Node.js, Next.js, and multi-tenant PostgreSQL systems.
- Maintained rigorous deployment policies using Terraform and multi-stage AWS code pipelines, successfully eliminating release regressions.

OmniTech Applications | Philadelphia, PA

Senior Software Engineer | September 2014 – June 2018

- Engineered and scaled core backend application services utilizing Django, Celery, and custom REST frameworks, accommodating a 3x user expansion.
