

Liam Henderson

Full-Stack Software Engineer (FastAPI / React) Salt Lake City, UT | (555) 890-1234 | liam.henderson@email.com | linkedin.com/in/lhenderson

Professional Summary

Versatile Full-Stack Engineer with 5 years of professional experience bridging high-speed Python backend processing engines with modern React web frontends. Specialized in building async data pipelines via FastAPI, managing complex state workflows, and building responsive, secure applications across cloud architectures.

Full-Stack Skills

- **Backend Stack:** Python, FastAPI, Flask, SQLAlchemy, Celery, Alembic
- **Frontend Stack:** JavaScript, TypeScript, React, Redux Toolkit, Tailwind CSS
- **Data & Operations:** PostgreSQL, MySQL, Docker, AWS (ECS, S3), CI/CD (CircleCI)

Professional Experience

BioInformatics Hub | Salt Lake City, UT
Full-Stack Software Engineer | September 2023 – Present

- Architected high-throughput, asynchronous API layers using FastAPI and SQLAlchemy to serve genetic mapping matrices to internal researchers.
- Engineered a dynamic data visualization dashboard using React, TypeScript, and Chart.js, decreasing payload render latencies by 50%.
- Optimized slow relational data joins within a multi-gigabyte PostgreSQL database, boosting analytical reporting frequencies.

Zenith SaaS Platforms | Provo, UT
Software Engineer (Backend Focus) | October 2021 – September 2023

- Developed and expanded modular multitenant configurations using Flask and PostgreSQL for a leading enterprise CRM software.
- Configured deployment workflows utilizing CircleCI, shortening code promotion times to staging environments down to 4 minutes.
- Integrated Stripe subscription payment mechanisms into backend billing microservices with complete validation handling.

Education

Institution	Degree	Graduation Date
University of Utah	B.S. in Computer Science	May 2021
