

Priya Nair

Java Software Engineer (Spring Boot / Microservices) Chicago, IL | (555) 567-8901 | priya.nair@email.com | [linkedin.com/in/priyanairtech](https://www.linkedin.com/in/priyanairtech)

Professional Summary

Proficient Backend Software Engineer with 5 years of dedicated enterprise development experience focusing on Java, Spring Boot microservices, and distributed cloud systems. Accomplished track record of executing migration strategies, designing relational/non-relational storage layers, and accelerating deployment pipelines within Agile structures.

Core Expertise

- **Core Engineering:** Java 11/17, Spring Boot, Spring Cloud, Spring Security, OOP design patterns
- **Data & Streaming:** PostgreSQL, MongoDB, Redis, Apache Kafka, RabbitMQ
- **DevOps & Cloud:** AWS (EC2, RDS), Docker, Kubernetes, Jenkins pipelines, Git

Professional Experience

Apex Logistics Systems | Chicago, IL
Software Engineer III | July 2023 – Present

- Architected and implemented a high-performance routing microservice utilizing Java 17, Spring Boot, and Apache Kafka, handling 500k distributed events hourly.
- Secured edge APIs by integrating Spring Security and OAuth2/JWT protocol suites, eliminating vulnerabilities across internal endpoints.
- Migrated a legacy data tier over to an AWS managed PostgreSQL engine, decreasing daily query processing bottlenecks by 30%.

Sterling Insurance Digital | Indianapolis, IN
Software Engineer (Backend) | January 2021 – July 2023

- Engineered scalable batch processing engines using Spring Batch to automate underwriting reports for over 80,000 corporate policy holders.
- Containerized application environments using Docker and managed horizontal container scaling policies inside local Kubernetes clusters.

Education & Credentials
