

Marcus Vance

Lead Java Software Engineer Chicago, IL | (555) 014-7821 | marcus.vance.dev@email.com | github.com/mvance-java | linkedin.com/in/marcusvance

Professional Summary

Results-driven **Lead Java Software Engineer** with 8 years of professional experience designing, building, and deploying robust, scalable backend architectures. Expert in the **Java** ecosystem, **Spring Boot**, and **Microservices**, with a proven track record of migrating legacy systems to cloud-native platforms. Strong champion of DevOps practices, CI/CD automation, and mentoring high-performing engineering teams.

Core Technical Stack

- **Languages:** Java (8/11/17), SQL, Go, HTML5/CSS3.
- **Frameworks & Tools:** Spring Boot, Spring Cloud, Hibernate/JPA, Apache Kafka, Docker, Kubernetes.
- **Cloud & DevOps:** AWS (EC2, RDS, Lambda, EKS), Jenkins, GitHub Actions, Terraform.
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis.
- **Testing & Methodologies:** JUnit, Mockito, Agile/Scrum, CI/CD, Test-Driven Development (TDD).

Professional Experience

Nexus Financial Technologies | Chicago, IL *Lead Java Engineer* | April 2023 – Present

- Architecture-led and developed highly available, fault-tolerant **Java 17 / Spring Boot** microservices for a high-frequency trading platform processing over 2 million transactions daily.
- Led a team of 6 engineers in migrating a legacy monolithic application to an AWS cloud-native architecture using Kubernetes (EKS), reducing infrastructure costs by 35%.
- Implemented event-driven architecture using **Apache Kafka** to handle real-time data streaming and asynchronous transaction processing across banking systems.
- Establish CI/CD best practices with Jenkins and Docker, cutting deployment cycle times down from 2 weeks to multiple automated daily deployments.

Vanguard Retail Systems | Chicago, IL *Senior Software Engineer* | September 2020 – April 2023

- Developed backend RESTful APIs using **Java 11**, Spring Security, and Hibernate for an e-commerce platform servicing 500k+ active weekly users.
- Optimized slow database queries in PostgreSQL and introduced a **Redis** caching layer, which reduced API response times by 40% and improved Core Web Vitals.
- Spearheaded the integration of third-party international payment gateways, ensuring strict compliance with PCI-DSS security standards.
- Conducted rigorous code reviews, mentored 4 junior/mid-level developers, and established standardized Git workflows across the engineering department.

CoreLogic Solutions | Indianapolis, IN *Software Engineer* | June 2018 – September 2020

- Authored clean, maintainable **Java 8** code for data processing engines, utilizing multithreading and concurrency utilities to maximize throughput.
- Created unit and integration test suites using **JUnit and Mockito**, raising overall code coverage scores from 70% to 92% to minimize production bugs.
- Participated in active Agile/Scrum processes, including sprint planning, daily stand-ups, and look-back sprint retrospectives.

Education

Purdue University | West Lafayette, IN *Bachelor of Science in Computer Science* | Graduated May 2018

Certifications

- **Oracle Certified Professional: Java SE 17 Developer** | Oracle Corporation
- **AWS Certified Solutions Architect – Associate** | Amazon Web Services
