

Devon Zhao

Full-Stack Software Engineer (React / NestJS) Seattle, WA | (555) 876-5432 | devon.zhao@email.com | [linkedin.com/in/devonzhao](https://www.linkedin.com/in/devonzhao)

Professional Summary

Dynamic Mid-Level Full-Stack Software Engineer with 4 years of expertise engineering reliable, type-safe web infrastructures. Specializes in building modular React frontend apps paired with scalable TypeScript/NestJS microservices. Passionate about automated testing, infrastructure as code, and mentoring incoming engineering talent.

Technical Matrix

- **Languages & Core:** TypeScript, JavaScript, SQL, GraphQL, HTML/Sass
- **Frameworks:** React, NestJS, Express, Next.js, Fastify
- **Data & DevOps:** MongoDB, PostgreSQL, Prisma, Docker, AWS (S3, EC2), GitHub Actions

Professional Experience

CloudScale Systems Inc. | Seattle, WA
Software Engineer II | August 2024 – Present

- Architected and implemented a high-throughput content management engine utilizing NestJS and TypeScript, handling over 1.2 million daily requests seamlessly.
- Led the frontend structural redesign of an internal administrative console in React, cutting out complex layout shifts and boosting UX accessibility scores to 98%.
- Pioneered the transition of relational workflows to Prisma ORM, saving team members an average of 6 hours weekly on manual SQL schema modifications.

BrightWeb Solutions | Portland, OR
Full-Stack Developer | September 2022 – August 2024

- Developed modular components for a SaaS workflow tracking application leveraging React, Redux, and custom hooks.
- Containerized application stacks with Docker, cutting out continuous integration deployment failures down by 45%.
- Created real-time bidirectional messaging features with Socket.io to facilitate collaboration modules.
