

Sofia Rodriguez

Junior Python / Django Developer Denver, CO | (555) 789-0123 | sofia.rodriguez@email.com | github.com/sofiarod-codes

Professional Summary

Enthusiastic Junior Software Engineer with 2 years of professional software construction expertise leveraging Python backend ecosystems. Experienced in crafting object-relational database structures with Django and developing performant data ingestion tasks with Celery and PostgreSQL. Dedicated to writing clear, PEP 8 compliant source code.

Technical Toolkit

- **Languages:** Python, SQL, JavaScript (ES6), HTML5, CSS3
- **Frameworks & Tools:** Django, Django REST Framework, Flask, Celery, Pytest, Postman
- **Databases & Infrastructure:** PostgreSQL, SQLite, Redis, Docker basics, Git

Professional Experience

EcoData Analytics | Denver, CO

Junior Software Engineer | June 2024 – Present

- Constructed modular data endpoints using Django REST Framework to expose environment analytics to client-facing dashboards.
- Integrated asynchronous background processing queues using Celery and Redis, reducing web server request blocking intervals by 35%.
- Authored extensive automated unit tests using Pytest and Factory Boy, maintaining test coverage metrics above 85% continuously.

Peak Media Group | Boulder, CO

Associate Python Developer | May 2023 – June 2024

- Maintained custom automated content parsing web scrapers utilizing BeautifulSoup and Scrapy, updating ingestion modules to maintain data integrity.
- Managed database migrations and optimized schema fields within PostgreSQL under the direction of the system administrator.

Education

Institution	Degree	Graduation Date
University of Colorado Boulder	B.A. in Computer Science	May 2023
